RE: NPDES Permit No. NH0090000 / Discharge No. 005A

In the month of May, the Pease Wastewater Facility had no violations.

Enclosed is the semiannual toxicity report from New England Bioassay. Please note on May 4th as part of the toxicity testing a split TSS sample was taken. The results were averaged and reported.

The CL2 detection limit is 0.05mg/L and the plant reports less than the detection limit using Standard Methods 4500-CL-G Page 4 - 63 (colorimetric). The BOD detection limit is 5 mg/L and the plant reports less than the detection limit using Standard Methods 5210-B.

Sincerely,

Peter H. Rice
Director of Public Works
City of Portsmouth
